EDUCATION

- Ambalika Institute Of Management And Technology** Lucknow, India
Bachelor of Technology - Computer Science and Engineering ; GPA: 6.58 October 2021 - June 2025
Courses: Operating Systems, Data Structures, Object-oriented programming, Artificial Intelligence, Machine Learning, Databases

SKILLS SUMMARY

- Languages:** Python, JavaScript, SQL, JAVA
- Frameworks:** Bootstrap, Django,
- Tools:** VS code, GIT, MySQL
- Technical:** Operating Systems, Data Structures, Object-oriented programming, Artificial Intelligence, Machine Learning, Databases
- Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EXPERIENCE

- National Institute of Electronics and Information Technology** Internship
Artificial intelligence/Machine learning March 2025
 - Applied Machine Learning Techniques:** Building ML models using real-world datasets.
 - Data Preparation & Model Optimization:** Cleaning data and optimizing model performance.
 - Model Deployment & Real-World Integration:** Deploying AI models into real-time applications.
- Dijipodium**
Student Developer sep 2024 - dec 2024
 - Web Development with Django Framework:** Built dynamic websites using Django's MVC architecture.
 - Database Integration and ORM Usage:** Connected Django apps with databases using ORM.
 - Authentication and Admin Panel Customization:** Implemented user login and customized admin dashboard.

PROJECTS

- E-commerce Analytics Dashboard (2024):** Developed Developed a fully functional e-commerce website using HTML, CSS, Django and Python. The project features user authentication, product management, a shopping cart, and a secure checkout process. Implemented a responsive design to ensure a seamless user experience across devices, and utilized Django's ORM for efficient database management.
- College Management System:** Developed a Python-based application with a MySQL backend to automate student issuance and tracking their results.
- Scraper):** Created a web Scraper using Python, capable of fetching data from an e-commerce website.

CERTIFICATION

- Python Programming certification:** Gained proficiency in python complex topics.
- JAVA Certification (2023):** Advanced understanding of JAVA and complex data structure in java.
- Django Certification(2024)::** Gained proficiency in Django MVT architecture and ORM using python complex code.

PERSONAL INTERESTS

- Playing football (teamwork, strategy)
- Watching professional football (analytical thinking)
- Exploring new tech tools (curiosity, adaptability)
